To Whom It May Concern:

Haigh Pettican Ltd:

The above named company manufactured 40 No Hydrostatic test ends on our behalf, these test ends were 1220mm diameter X 22.4mm wall thickness and had an assortment of sweepolets, weldolets, dome ends and stabbings. Because of their intended use and the material was X80 some welds were subject to heat treatment and all welds were Non Destructively Tested. These test ends were made on time and according to the delivery schedule.

There were no QA or Inspection and Test problems associated with their manufacture. Within a week of delivery the entire QA package was received ,reviewed and accepted. The service we received and the quality of the finished product was excellent.
